PARTS OF THE PRODUCT

- Application tape
- Sticker
- Backing Paper

YOU WILL NEED...

- Clean cloth
- Masking tape
- Cutter or scissors
- Spatula or plastic card

HOW TO APPLY VYNIL DECAL

**1** Clean with a cloth and water the surface on which the vynil decal will be applied.

2 Resting the product on a flat surface, rub the spatula to make the application type adhere better to the sticker.

3 Place the product on the surface on which it will be applied and in the center, vertically, apply the masking tape.

4 Detach the application tape (sticker will remain attached to the application tape) and cut the part of the underlying support.

5 Starting from the center, spatulate outwards, making the sticker adhere to the surface. Remove the masking tape and repeat steps 4 and 5.

6 Starting from one corner, remove the application tape making sure that the sticker has fully adhered to the surface.
